Starting in ninth grade, the Career Plan is part of the documentation required for students working toward a CDOS Credential. It is used to track and update student engagement annually in the career planning process over the school year throughout high school.

**The Career Plan looks at five different areas:**
- personal data
- review of the student career plan
- review of the student’s knowledge
- review of student’s skills/application
- review of student’s experience from the current school year to see what they have learned about themselves to help make future decisions

Each section is used to help develop a plan when it comes to the student’s goals, skills, and interests around a career. The student is the most important person in the planning process as the career plan is used in the development of the career goal.

It will be completed each year-end from freshman to senior years of high school to show the process of career planning. The student’s stated preferences and interests on a career plan must be reviewed and addressed and considered with the Individualized Education Program (IEP) development.
